Data Dictionary (Tracking)

Baseline 60-minute Telephone interview

V3.0, 2016 April 30

Data dictionary (April 2016)

Canadian Longitudinal Study on Aging, baseline 60-minute telephone interview (Tracking assessment)

CLSA dataset	Count
Number of variables	1149
Number of participants	21241
Date	2016-04-30

Index

List of variables in: CLSA Comprehensive Assessment V1_Baseline

Glossary

Properties

The following properties are listed in a table for each variable:

Property	Value
label	Description of variable
Value type	Numeric (decimal or integer), text or date
Unit	Unit of measurement (if applicable)
Question	Interview question corresponding to the variable.
comment	Additional information on the variable. Abbreviations may include: n.i.e (not included elsewhere) and n.o.s (not otherwise specified).

Categories

(Categorized text variables only) Each row is a different category and each column provides the following information on each category:

Name: Value entered in the dataset.

Label: Description corresponding to value.

Missing: Checked if the value corresponds to not answering the question, either because the participant did not know the answer, refused to answer or is missing due to technical issues.

startdate

AGE_NMBR_TRM

Properties

Property	Value
Label	[en] Age (years)
Value type	integer
Unit	
Question	[en] What is your age?
Comment	[en] Calculated: Date of interview less reported Date of Birth. The few cases of ages outside the study population range (45-85) are due to time lapse issues between the initial recruitment stage and the actual date the interview was completed.

SEX_ASK_TRM

Properties

Property	Value
