Healthy Sexuality (SEX)

Overview	<p>Despite an aging population, little is known about the sexuality of older adults. The purpose of this module is to collect information about healthy sexuality in our population.</p> <p>The questions in the module are based on a review of sexual health questionnaires from the English Longitudinal Study on Ageing, the Irish Longitudinal Study on Ageing, the National Social Life, Health, and Aging Project, and the National Institutes of Health's Patient-Reported Outcomes Measurement Information System® Sexual Function and Satisfaction.</p>

Chronic Conditions (CCT)

Overview	This module deals with long-term health conditions, diagnosed by a health professional, that have lasted or are expected to last at least 6 months or more.
-----------------	---

CCT_1	CCT_HRTFAIL_SUP3	
[ALWAYS ASK]		
Has a doctor ever told you that you have heart failure (sometimes identified or referred to as “congestive heart failure”, “CHF”, “fluid on the lungs” or “generalized swelling”/edema)?		
PARTICIPANT NOTE: Heart failure occurs when the heart muscle doesn’t pump blood as well as it should. When this happens, blood often backs up and fluid can build up in the lungs, causing shortness of breath, or in the body, causing swelling or edema. It is caused by other health conditions such as narrowed arteries in the heart (coronary artery disease), high blood pressure, blockage of a heart valve, or inflammation of the heart muscle that leave the heart too weak or stiff to fill and pump blood properly.		
YES	1	Yes
NO	2	No

CCT_1a	CCT_HRTAGE_SUP3

At what age or in what year were you first told you had heart failure or congestive heart failure?		
PARTICIPANT INSTRUCTIONS: EXACT AGE IS OPTIMUM, HOWEVER, IF YOU ARE UNSURE OF THE EXACT AGE, PLEASE PROVIDE YOUR BEST POSSIBLE ESTIMATE WITHIN FIVE YEARS.		
NB_SP	Age	_____ (MASK: MIN=00, MAX=CURRENT AGE)
YR_SP	Year	_____ (MASK: MIN=YEAR OF BIRTH, MAX=CURRENT YEAR)

REFUSED	9999	[DO NOT READ] Prefer not to answer

CCT_2	CCT_ARRYTH_SUP3	
[ALWAYS ASK]		
Has a doctor ever told you that you have a heart arrhythmia or irregular heartbeat?		
PARTICIPANT NOTE: Heart rhythm problems (arrhythmias) occur when the electrical signals that coordinate the heart's beats don't work properly. This can cause the heart to beat too fast (tachycardia), too slow (bradycardia) or irregularly. Common types of an irregular heartbeat would include premature beats (sometimes described as "skipped beats") and atrial fibrillation.		
YES	1	Yes
NO	2	No

Family History (FAM)

Overview	In this module, respondents are asked to provide information related to their family history of longevity and certain diseases. The information being collected will help to understand the genetic influence on longevity, healthy aging, and the development of common age-related conditions. The questions are limited to biological (blood relations as opposed to relations acquired through marriage, adoption, or fostering) first degree relatives (i.e., parents, siblings, and children of the participant).
-----------------	---

Programming note: For every disease, FAM_XXXX_SIB_n_AGE_SUP3 and FAM_XXXX_CHILD_n_AGE_SUP3 repeats as per response entered in FAM_SIB_NB_SUP3 and FAM_CHILD_NB_SUP3 up to a maximum of 20 times.

For every introductory disease question:

ASK FAM_xxx_MB_SUP3 IF FAM_TWIN_SUP3 = YES_TWIN OR YES_TRIPLET OR YES_OTHER

ASK FAM_xxx_SIB_SUP3 IF FAM_SIB_NB_SUP3 ≥ 1

ASK FAM_xxx_CHILD_SUP3 IF FAM_CHILD_NB_SUP3 ≥ 1
